

Dear Parent/Guardian,

We are excited to present you with the opportunity for your child to join Algorithmics!

Algorithmics is one of the top UK online coding schools. Our online classes have been attended by more than 1,500 students in the UK. We successfully ran the Python coding course at the Royal Grammar School last year. Since March 2020, we have switched to teaching online via virtual classrooms.

We are excited to open enrolment for new students for the 2020/2021 academic year.

Within a year, students will learn how to:

- use basic knowledge and principles of programming in Python;
- install and configure the development environment;
- programme for a given scenario;
- programme objects in space;
- write programs using various professional code libraries;
- optimize code.

Please join us for a free taster lesson on **October 3 or October 10 at 2:00pm**. To sign up, visit our website and select **RGS taster lesson** option.
