Dear Parents,

Y7 Elevate Workshop

Following on from the successful workshop on Memory Mnemonics delivered by Elevate Education on Wednesday last week, please find links to the student implementation guide and teacher resource kit which we would have used during form time after Easter to follow up on the workshop.

The student implementation guide below contains follow-up exercises and activities, as well as tips for putting the skills into practice. The teacher resource provides an explanation of the skills covered in the session for staff, as well as ideas to embed these skills in the classroom. Schools that use these resources see a significant increase in skill retention, and they form an integral part of the programme. Also attached for reference is a completed example of the booklet the boys filled out during the workshop.

Seminar	Year	Teacher Resource	Student Resource
Memory Mnemonics	7	Memory Mnemonics - Teacher Resource Kit (UK).pdf	Memory Mnemonics - Student Activity Pack (UK).pdf

Finally, just a reminder about the [student website](#) login details - once you click on the 'Student Portal' you might be prompted to provide a password which is: *rondo*

I hope that your son will find this support a useful addition to his learning skills development.

Kind regards

Mr Rose

Head of Year 7
