

## Insurance Apprenticeship Programme

**Location:** London

**Salary:** £18,650

If you're keen to pursue a career in insurance and eager to embark on a rewarding career without a university education, this is an opportunity to work at the core of our business – in Insurance.

Lasting for 15 months, our Apprenticeship programme consists of multiple placements within the Lloyd's Corporation as well as the Lloyd's Market. You could find yourself managing relationships with international regulators or analysing metrics for a cyber campaign. You could also work in some of our non-insurance teams, such as Procurement or Marketing. You'll work to the Level 3 Insurance Practitioner apprenticeship standard, an important step on the road to completing the Cert CII qualification.

You should have three A-levels (or equivalent) at grade C or above in any subject, and GCSE Maths and English (or equivalent) also at grade C or above. We'll want to see that your skills align with our values-led competencies too.

### About Lloyd's

A unique combination of a specialist insurance market and a Corporation, we provide the financial support to enable businesses, governments and people to recover as quickly as possible when the unexpected happens. With us, there will always be something new for you to learn. New potential to explore. New innovations to master.
