The Bucks Skills Showcase

This took place online in November with an array of online careers opportunities allowing students, parents and teachers to explore the world of work. The interactive careers platform allowed young people to discover different industry sectors and find vital information about the job market in both Buckinghamshire and nationally, with information on sectors such as Construction, The Creative Industries, High Performance Engineering, Space and more. Not only this, but the 2021 Skills Show saw workshops hosted on what skills employers are looking for right now, how organisations are working to reduce their environmental impact, and what will jobs look like in the future. If you missed them watch the recordings below.
