Summer Support Work

Chemistry - Year 10

Follow the below procedure and tick off as each task is completed.

- 1 Use your end of Year paper to improve your revision notes and further study the topics you should have prepared.
- 2 When more confident attempt the questions in this booklet in **black ink** without referring to your notes (you could do this in several sittings)
- 3 Return to this booklet and use your notes to help finish and improve your answers in **blue pen**.
- 4 In September, use a Mark Scheme during drop in support sessions to work through the correct answers making corrections in red/green pen. Get help if not sure
- 5 Review where you still need to make further improvement, summarise this on the review page at the back of this booklet, and factor this in to revision for your mock exam.
- 6 See Mr Young to show that you have completed all of the above by **mid September**.

Name.....

Review page – list the topics that still need further revision
