Dear Parent and Student,

Summer support material - Chemistry

Following on from the End of Year exams I would strongly recommend that your son engages in some additional study before the start of the next academic year. Having reviewed the End of Year paper, he should be aware of which particular areas he needs to focus on but can as well ask his teacher for suggestions. The level of available resources to aid learning and revision is vast and, in addition to the resources shared through his teacher, I recommend many useful websites to help improve knowledge and understanding. Some are listed below:

KS3 (Year 7 and 8)

<https://www.samlearning.com/>

<https://www.bbc.co.uk/bitesize/subjects/znxytd>

<https://app.senecalearning.com/dashboard>

<https://www.youtube.com/playlist?list=PL51jd6xG52BWabfHuphcKrB4HxT5LU-aA>

GCSE (Year 9 and 10) (Exam Board Edexcel)

<https://www.physicsandmathstutor.com/chemistry-revision/gcse-edexcel/>

<https://app.senecalearning.com/dashboard>

<https://cognitoedu.org/home.html>

<https://mathsmadeeasy.co.uk/gcse-chemistry-revision/>

<https://www.footprints-science.co.uk/index.php?subject=Chemistry>

<https://www.samlearning.com/>

I would, however, request that he does engage with the accompanying materials. Working through this and returning in September ready to go through it with the support of the Subject Ambassadors would represent part of an excellent and appropriate response to the recent performance in the End of Year Examinations.

Parents, your assistance in encouraging your son to take greater responsibility for his learning would be much appreciated and I hope to see your son make good progress in the new academic year.

Your son has also been sent this letter to his school email account and that is considered his notification of the suggested next steps.

Yours sincerely

James Young

Subject Leader for Chemistry
