

Dear Parent/Guardian,

We are excited to present you with the opportunity for your child to join Algorithmics!

Algorithmics is one of the top UK online coding schools. Our online classes have been attended by more than 10 000 students in the UK. We have been successfully running programming courses at RGS since January 2020.

We are excited to open enrolment for new students for the 2021/2022 academic year.

Within a year, students will learn how to:

- use basic knowledge and principles of programming in Python;
- install and configure the development environment;
- programme for a given scenario;
- programme objects in space;
- write programs using various professional code libraries;
- optimize code.

Please join us for a free taster lesson. To sign up, visit our website and select **RGS taster lesson** option.
